

Title: Spiky profiles - neurodiversity

(0:03) [Music]

(0:05) if we used a graph to plot individual
(0:07) people's abilities no doubt they would
(0:09) all look different
(0:11) we all have different strengths and
(0:13) things we find more challenging it's one
(0:15) of the things that makes us unique
(0:18) but for those of us with a neurological
(0:20) condition such as adhd autism or
(0:23) dyslexia the differences between our
(0:25) strengths and what we find challenging
(0:28) are often much more pronounced it's
(0:30) likely a neurotypical person's profile
(0:33) would look reasonably flat with some
(0:35) small peaks and troughs compared to a
(0:37) neurodivergent person's profile which
(0:39) would be much more spiky
(0:43) if neurodivergent people can be
(0:45) supported with those things that they
(0:46) find more challenging their exceptional
(0:49) strengths mean that they can achieve
(0:50) amazing things
